Duration	3 mins 23 secs
Grade	**13.00** out of 15.00 (**86.67**%)

Question **1**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

a. Deleting elements from a list
b. Determining whether an element is present in a list ✓
c. Inserting elements into a list
d. Sorting elements in a list

Question **2**

Correct

Mark 1.00 out of 1.00

In linear search, if the target element is not found in the list, what is the result?

a. An error is raised
b. The last element is returned
c. The first element is returned
d. The search is considered unsuccessful ✓

Question **3**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

a. Linear search ✓
b. Binary search
c. Jump search
d. Hashing

Question **4**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

- a. Hashing
- b. Binary search
- c. Linear search ✓
- d. Dynamic search

Question **5**

Correct

Mark 1.00 out of 1.00

What is the first step in binary search?

- a. Compare the target element with the middle element in the list ✓
- b. Compare the target element with the first element in the list
- c. Sort the list
- d. Divide the list into two equal parts

Question **6**

Correct

Mark 1.00 out of 1.00

What is the advantage of binary search over linear search?

- a. Binary search does not require dividing the list
- b. Binary search works on unsorted lists
- c. Binary search has a lower time complexity on large, sorted lists ✓
- d. Binary search can find multiple instances of the target element

Question **7**

Incorrect

Mark 0.00 out of 1.00

What type of search would be most appropriate for finding an element in a list that is frequently updated?

- a. Hash search ✗
- b. Interpolation search
- c. Linear search
- d. Binary search

Question **8**

Correct

Mark 1.00 out of 1.00

What is the best-case time complexity of linear search?

a. O(n log n)
b. O(1) ✓
c. O🥱
d. O(log n)

Question **9**

Correct

Mark 1.00 out of 1.00

Which of the following statements about linear search is true?

a. Linear search requires the list to be sorted.
b. Linear search is more efficient than binary search on large lists.
c. Linear search can be applied to both sorted and unsorted lists. ✓
d. Linear search divides the list into halves.

Question **10**

Correct

Mark 1.00 out of 1.00

In _____ checks the elements of a list, one at a time, without skipping any element.

a. Hash search
b. Binary search
c. Both (1) & (3)
d. Linear search ✓

Question **11**

Correct

Mark 1.00 out of 1.00

In which type of search is the list divided into smaller sublists during the search process?

a. Binary search ✓
b. Linear search
c. Hash search
d. Sequential search

Question **12**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

a. At the beginning of the list
b. In the entire list
c. In the left sublist ✓
d. In the right sublist

Question **13**

Incorrect

Mark 0.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 99; what are the mid values(corresponding array elements) in the first and second levels of recursion?

a. 90 and 99
b. 90 and 94 ✗
c. 89 and 99
d. 89 and 94

Question **14**

Correct

Mark 1.00 out of 1.00

Which of the following is not the required condition for a binary search algorithm?

a. There must be a mechanism to delete and/or insert elements in the list ✓
b. Number values should only be present
Number values should only be present
c. The list must be sorted
d. There should be direct access to the middle element in any sublist

Question **15**

Correct

Mark 1.00 out of 1.00

In linear search, how is the element searched?

a. By dividing the list into halves
b. By comparing each element in the list sequentially ✓
c. By using a hash function
d. By sorting the list first
